

Learners from 200 high schools compete for 2010 FIFA World Cup™ tickets

Learners from 200 schools throughout South Africa have feverishly been collecting cans and bottles in a competition which will earn them their share of 20 000 tickets to the 2010 FIFA World Cup™ games during June and July of this year. The competition, which has been running since January 18, comes to an end this Friday, February 19.

Selected by the Department of Education, each school forms part of the Coca-Cola National Schools Recycling Programme – called *Give It Back* - which will award 20 000 tickets to the 2010 FIFA World Cup™ games through the FIFA Ticket Fund, which was created to enable South Africans who cannot afford to buy tickets, the opportunity to attend matches.

Deputy Principal of the Diepsloot Combined School in Johannesburg, Mr Noel Maringa said, “Our pupils are passionate about this programme. It has been very easy to get the message across about the need for recycling”.

Mr William Rambau, Life Orientation Teacher at the same school, said that the Coca-Cola’s *Give It Back* project is an important part of citizenship education. “This is not just about the tickets, but it is also about raising awareness on conserving our environment among the youth.. The participants know that this is really about the environment and we will take the programme beyond the FIFA World Cup™ tournament. This touches our wider community as littering is a big problem”, he went on to explain.

The Coca-Cola National Schools Recycling Programme focuses on recycling and the inculcation of a recycling culture among the learners. The programme also supports FIFA’s “Green Goal” programme of heightening awareness and encouraging participation in efforts of saving our environment.

“Coca-Cola chose recycling as one of its legacy projects around its partnership with FIFA on the 2010 FIFA World Cup™ spectacular in South Africa. This initiative also fits in well within Coca-Cola’s *Live for a Difference* business philosophy of doing business in a way that adds value to the communities that we do business in,” says Onwell Msomi, the General Manager 2010 FIFA World Cup™ Project Unit at Coca-Cola South Africa.

Since the FIFA Ticket Fund launch in August 2009, Coca-Cola has successfully provided training for Department of Education (DoE) facilitators, who in turn have trained 697 teachers across all nine provinces.

“These teachers have been tasked with educating learners in the classroom on the environmental curriculum that underpins this competition, as well as the rules, regulations and mechanics of the 2010 FIFA World Cup™ Ticket Fund,” adds Msomi.

The curriculum focuses on promoting the environment and ways in which people can reduce the negative impact that modern society has on it.

In addition to participating in classroom-based lessons, learners are currently collecting PET (polyethylene terephthalate) plastic bottles and cans for recycling. Those who collect the most bottles and cans will win tickets to one of the 64 games of the 2010 FIFA World Cup™.

A creative competition forms part of the programme and allows more learners to win tickets.

Mr Enver Surty, Deputy Minister of Basic Education, welcomed the initiative as an opportunity to promote sustainable development by harnessing the excitement of the first ever African World Cup. Mr Surty said, "The Department of Basic Education supports the Coca-Cola National Schools Recycling Competition as an important initiative to encourage young people to support recycling and sustainable development from an early age. Let's all act together to protect our environment and secure our planet for future generations."

Collect-a-Can and PETCO will be providing the necessary support for the collection of cans and bottles for this initiative. Mathabo Phomane, Public Relations and Marketing Manager for Collect-a-Can indicated, "We at Collect-a-Can are delighted to be part of the Coca-Cola National Schools Recycling Programme. This project touches on two of our core major focuses – empowerment of the less fortunate through recycling and educating the youth from an early age about the importance of recycling. Through this initiative we are able to show the youth that recycling can be fun and rewarding."

The competition closes this Friday, February 19, 2010. All the materials that have been collected by the learners during the competition period will be collected from their schools to be taken to recycling sites during the week commencing Monday, February 22.

Ends

About Collect-a-Can

Collect-a-Can is a joint venture between ArcelorMittal South Africa (Africa's major steel producer and producer of tinplate for food and beverage cans) and Nampak (Africa's largest packaging company and beverage can producer). Collect-a-Can actively works within the community to support recycling initiatives and have a strong commitment to socio economic empowerment. They have worked very closely with schools over the past 17 years, raising the awareness and importance of recycling from an early age. Collect-a-Can is dedicated to ensure that used beverage cans and consequently tinplate, exist in harmony with the environment. The company is involved in the recovery of all scrap tinplate generated in the tinplate and can-making processes. Collect-a-Can is a recovery as opposed to a profit driven company. Collect-a-Can have branches in Gauteng, Western Cape and KwaZulu Natal; they are also represented in Botswana and Namibia. For more information on Collect-a-Can visit www.collectacan.co.za
